FDTC's Motivation and Scope

FDTC is the annual workshop focusing on Fault Diagnosis and Tolerance in Cryptography. In recent years applied cryptography has developed considerably to satisfy the increasing security requirements of various information technology disciplines, e.g., telecommunications, networking, data base systems and mobile applications. Cryptosystems are inherently computationally complex and in order to satisfy the high throughput requirements of many applications, they are often implemented by means of either VLSI devices (crypto-accelerators) or highly optimized software routines (crypto-libraries) and are used via suitable (network) protocols. The high complexity of such implementations raises concerns regarding their reliability. Research is therefore needed to develop methodologies and techniques for designing robust cryptographic systems (both hardware and software), and to protect them against both accidental faults and intentional intrusions and attacks, in particular those based on the malicious injection of faults into the device for the purpose of extracting the secret key. This workshop was started in 2004 and had annual follow-ups since then. The number of participants has steadily grown to more than 100 in 2010 and in 2011.

FDTC 2012

The 9th FDTC workshop will be held on Sunday September 9th, 2012 in Leuven, Belgium. More information is available on the workshop's website:

<http://www.fdtc-workshop.eu>.

The steering committee invites sponsors to support FDTC 2012. Please select any of the sponsorship options listed below or contact us to discuss your custom sponsorship.

- Option 1: € 750 (~ USD 1000, JPY 82 000):
display of your logo on FDTC's website and in the proceedings, to be published by Conference Publishing Services,
- Option 2: € 1500 (~ USD 2000, JPY 164 000):
as option 1 plus two free, full registrations for FDTC 2012,
- Option 3: € 2500 (~ USD 3350, JPY 273 000):
as option 1 plus four free, full registrations for FDTC 2012.

For custom sponsorship, the benefits can include any of the following, depending on the level of support:

- display of your logo on FDTC's website and in the proceedings, to be published by Conference Publishing Services,
- free, full registrations to FDTC 2012,

- exhibition of a poster in the workshop room, and/or exhibition of other promotional material in the registration and breaks area,
- inclusion of information about your company/institution in the proceedings bag,
- print of your logo on the proceedings bag.

If you are interested in supporting the FDTC workshop 2012, please contact the program co-chairs: Guido Bertoni (guido.bertoni@st.com) Benedikt Gierlichs (benedikt.gierlichs@esat.kuleuven.be).
